

Improving hatchery performance!

THE TILAPIA HATCHERY EXPERTS

With its vast experience of more than 25 years, Til-Aqua International has come across numerous issues in both our own facilities as well as in our customers' facilities. Tackling these issues one by one has provided our company with the expertise to optimally run a tilapia hatchery and nursery!

The **problems you encounter...**

...are the **challenges we have overcome!**

- *Disease-free fish?*
- *Increased male ratio?*

Til-Aqua Genetics:

Our fish are confirmed to be free of various diseases such as TiLV. The YY Technology results in stronger offspring with a high male ratio. Also to be applied with local female strains!

- *Higher survival of fry?*
- *More uniform-sized fry?*

Til-Aqua Services: The Kit

Our low-cost systems are designed for optimal management while requiring minimal energy. Both Incubation and Swim-Up can be cleaned and disinfected easily and proper feeding and treatment can be applied.

- *Improving management?*
- *Starting a hatchery?*

Til-Aqua Services: The Training and Support

Our educational program helps to exploit the full potential of both hatchery and fish by sharing our protocols and experience. Starting a new hatchery? Get the full package of **design, systems, genetics** and **knowledge** to be optimally prepared!

Genetics: BROODSTOCK & NMT

- Stronger fish
- >99% Male Ratio
- Better performance

Services: INCUBATION SYSTEM
