THE TILAPIA HATCHERY EXPERTS

Til-Aqua International has developed a hands-on educational program to transfer its knowledge and vast practical experience in hatchery & nursery management. Looking to start up your own facilities or improve management practices? Prevent or overcome challenges by ***becoming well-educated and well-prepared!***

To fit your specific requirements, different durations are available:

2	**days Nursery Course** Basic handling of tilapia fingerlings	**€1,000.00***
5	**days Hatchery Nursery Course** Complete course from spawning till grow-out	**€2,250.00***
10	**days Intensive Hatchery Nursery Course** Complete course from spawning till grow-out: Elaborated practice and discussion	**€4,500.00***

****Prices exclude travel, meals and accommodation***

EXPLORING ***MANAGEMENT…***

…EXPLOITING POTENTIAL!

Depending on duration, training subjects include:

Background on tilapia biology and farming - Quarantine procedures - Biosecurity protocols - Cleansing and desinfection - Hatchery design - RAS application - System management - YY Technology - Sex determination - Parasite control and treatment - Water quality parameters - Feed quality - Feed management - Grading strategy - and many more...!

As many subjects as possible will be demonstrated and performed within the facilities to give the training its hands-on character. The theoretical background is explained and discussed through the Til-Aqua Factsheets which can afterwards serve as a reference book. Training contents can be tuned to meet specific requests; for example to evaluate a business plan, to design a new hatchery or to tackle encountered issues.
